DEEPAK YADAV

Houston-Tx | +1 (832) 614 2093 | ydeepakb@gmail.com
LinkedIn : https://www.linkedin.com/in/ydeepakb/
Online Profile: **https://ydeepakb.github.io/static-profile-dy/**

Lead Engineer with 12+ years of experience designing and delivering **cloud-native, full-stack applications** across **e-commerce, finance, insurance, and healthcare** domains. Proficient in **.NET, C#, React, Angular**, with strong expertise in **AWS, Azure DevOps, Docker, Service Bus, SQL Server, and PostgreSQL**. Skilled in leading cross-functional teams, implementing **CI/CD pipelines**, and building **scalable, secure, and high-performance enterprise solutions**.

SKILLS:

Frontend: React, Angular, Next.js, TypeScript, JavaScript, JQuery, MantineUI, Tailwinds css.
Backend: C#, .NET Core, ASP.NET MVC, Microservices, Node.js, Python, RESTful APIs.
Cloud & DevOps: AWS (EKS, Lambda, S3, RDS, SQS/SNS), Terraform, Docker, CI/CD (azure-dev ops)
AI / Platform: MCP Servers, AI Tooling Integration, Prompt-Driven Orchestration, VS Code AI Extensions, Python (Transformers / Inference Pipelines)
Databases: SQL Server, PostgreSQL, MySQL, DynamoDB, MongoDB (Atlas), SSIS/SSRS.
Testing: TDD, Jest, NUnit, SonarQube.
Messaging: Azure Service Bus
Methodologies: Agile, Scrum, System Design, Enterprise Architecture, Solution Architecture.

EXPERIENCE

July 2023 - Present

Lead Engineer| Exafluence | Houston-Tx

Project:
ProAg is a U.S.-based crop insurance provider offering federally sponsored Multiple Peril Crop Insurance (MPCI), crop hail insurance, livestock coverage, and private insurance products across 48 states.

Roles & Responsibilities:

- Led the **end-to-end project lifecycle**, including requirements analysis, **enterprise architecture design**, implementation, deployment, and post-production support.
- **Designed and implemented an AI-enabled MCP (Model Context Protocol) server** to expose enterprise microservices as AI-callable tools, enabling conversational and tool-driven interactions.
- Defined and documented **enterprise-level solution architectures** using **UML, sequence diagrams, component diagrams, and deployment models** (Enterprise Architect / similar modeling tools).
- Designed, developed, and secured **RESTful APIs** using **C# and .NET Core**, integrating with **API Gateway**, **IAM roles**, and fine-grained security policies.
- Architected and deployed **cloud-native, scalable solutions on AWS**, leveraging **EC2, S3, Lambda, RDS, CloudWatch, and IAM**.
- Implemented **Infrastructure as Code (IaC)** using **Terraform**, enabling repeatable, compliant, and automated environment provisioning.

- Designed **backend architectures and rule-engine frameworks** using **Entity Framework (Code-First)**; executed **complex data migrations**, schema evolution, and performance optimization.
- Established and enforced **enterprise engineering best practices**, including **TDD**, secure coding standards, peer code reviews, **CI/CD automation**, and containerized deployments using **Docker and EKS**.
- Led and mentored **cross-functional Agile teams**, facilitating sprint planning, backlog grooming, daily stand-ups, demos, and retrospectives.
- Ensured high software quality through **unit, integration, and regression testing** using **NUnit** and front-end testing frameworks; owned **release planning, versioning, and delivery tracking**.
- Implemented **enterprise-grade monitoring and observability**, integrating **AWS CloudWatch**, **Datadog**, and custom health-check frameworks to ensure system reliability and SLA compliance.
- Authored **technical architecture documents, design specifications, and operational runbooks**; supported **user training** and **multi-region production rollouts**.

Tech Stack: React, C#, .NET Core, Microservices, AWS Docker, EKS, DevOps CI/CD, SQL Server, PostgreSQL, Azure Service Bus.

July 2021 – July 2023

Sr. Software Engineer | Atos/Syntel | Houston-Tx

Project: Pol-Admin (Policy Administration System) – Quote creation, policy management, endorsements, and claims processing. Core rating logic for premium computation.

Roles & Responsibilities:

- Implemented Angular features: AJAX, DOM sanitization (XSS protection), Guard services, and responsive UI/UX.
- Integrated Bootstrap for tables and styling; customized Material Design elements.
- Converted UX designs into Angular pages with external JS dependencies.
- Performed unit testing of Angular components using Jasmine and Karma.
- Managed environment configurations for Dev, QA, Staging, and Prod.
- Optimized performance by reducing unnecessary change detection and component re-renders.

Tech Stack: Angular 8, C#, WCF Services, REST API, Web API, SQL Server, PL/SQL, Postman, Swagger UI.

July 2017 – July 2021

Software Specialist | Majesco | Houston-Tx

Projects: Quote Bind (v5): Web-based auto insurance quoting system; integration with Guidewire Policy & Billing Center. **QuickPay & Moderator:** Payment processing and moderation tools.

Roles & Responsibilities:

- Code review, development, bug fixing, impact analysis, project architecture, team management, and client interaction.
- Integrated with rule engines, payment systems, and address/prospect services across states.

Tech Stack: ASP.NET 4.6.2, Angular 4/AngularJS, jQuery, Web Services, SSIS, SSRS, TFS/DevOps.

Feb 2017 – Sep 2017
Sr Developer | Deloitte-India | Mumbai-India

Project: GST Bolton Tool – Automates extraction and transformation of Form 26AS for TDS returns.

Roles & Responsibilities:

- Development, bug fixing, impact analysis, requirement gathering, design, and deployment.

Tech Stack: ASP.NET 4.5, Angular 4, jQuery, ASP.NET MVC

Dec 2015 – Jan 2017
Sr Software Engineer | CitiusTech| Mumbai-India

Project: HCP Community Portal – Provides reports and information for healthcare entities, patients, and lab results.

Roles & Responsibilities:

- Development, unit testing, deployment, bug fixing, impact analysis.
- Received "Best Performer" award twice in 2016.

Tech Stack: ASP.NET MVC 5, ASP.NET 4.5, jQuery, Entity Framework

Project: MSC-Azure – Transforming big data from EMR and CPS systems using **Azure and Hadoop**.

Roles & Responsibilities:

- Cluster creation, scripting, POC on Hadoop/HDInsight, impact analysis.

Tech Stack: Azure Data Factory, Hadoop, Hive, PIG

Oct 2013 – Dec 2015
Software Engineer | Rave Technologies (AKA NEC Software) | Mumbai-India

Project: IET Web Portal – Subscription management, payments, role-based access, reporting.

Roles & Responsibilities:

- Requirement gathering, coding, unit testing, deployment, bug fixing, impact analysis.

Tech Stack: ASP.NET 4.5, ASP.NET MVC, jQuery, HTML5, Web Forms, MarkLogic

EDUCATION

- PGDM in Operations Management from Welingkar Institute of Management (Year 2019-2020) – 71%
- Bachelor of Computer Engineering from Mumbai University (Year 2009-2013) – 70%

CERTIFICATION

- 98-363 MTA: Web Development Fundamentals(C#)
- Aws Cloud Practitioner

LANGUAGES

English - Professional, Hindi - Professional, Spanish - Beginner
